ATTACHMENT 4: Course Alignment..... 82

EXECUTIVE SUMMARY

Provide a brief overview of your school, including:

- *An overview of the mission and vision for the expanded school or network, noting any revisions to the approved mission and vision for the school relating to the addition of a distance education program. Be sure to note the extent to which the distance education programming will be leveraged.*

Doral Academy of Nevada (DAN) is seeking to expand its high-performing school network by increasing DAN's capacity to serve students already enrolled in grades 6-12. Through offering distance education, DAN will supplement and enhance its traditional courses with access to virtual learning opportunities for students in need of credit recovery, academic challenge such as advanced math courses, or a more diverse selection of electives such as foreign language that DAN may not otherwise be able to offer. DAN seeks to implement an exemplary virtual learning program to effectively prepare students for success in college and career.

Mission and Vision. Specifically, DAN requests to offer select students enrolled in grades 6-12 the opportunity to enroll in differentiated distance education courses to expand its mission and vision to intentionally include a supplemental distance education program specifically for students who are traditionally underserved or at risk for academic failure.

Mission

Doral Academy of Nevada is dedicated to providing an enhanced educational experience for all students. We will develop outstanding student achievement with focus on each child being well-rounded in all parts of education. Students will be prepared in an academically challenging and personally meaningful learning environment with an emphasis on arts integration, and increasing literacy, cognitive, and social development for all students. A collaborative effort including students, teachers, parents, and staff will be devoted to establishing, achieving, and celebrating individual goals for each child at Doral Academy.

Vision

The educational outcome from Doral Academy of Nevada will create lifelong skills including: critical and analytical learning, confident decision makers, problem solvers, collaborative workers, and imaginative and creative thinkers. We are committed to equip all students with the skills and personal growth necessary to be successful scholars throughout life.

- *Proposed model and target communities by zip code*

DAN proposes to supplement and enhance its current innovative coursework with a blended learning model that combines face-to-face and online distance education instruction that will allow DAN to pool and leverage its teaching resources to offer students enrolled in grades 6-12 the opportunity to take credit bearing courses if they are in need of credit recovery, academic challenge, or participate in electives that DAN may not otherwise be able to offer. The proposed distance education program will be student-driven and student-centered with the goal to improve student achievement, provide students with more academic choices and options, and personalize learning in a blended format. Students will participate in distance education courses in a designated virtual classroom with the opportunity to engage with a virtual instructor and coursework in a blended face-to-face academic and technical support format.

DAN's target community for the proposed distance education program is students already enrolled in grades 6-12 who hail from all area codes across the Las Vegas Valley. However, students must be currently enrolled in DAN to participate in its distance education program. DAN does not seek to offer distance education courses to students outside of its network or that are not currently full-time enrolled DAN students.

Specifically, DAN seeks to meet the needs of its students who are newly enrolled in DAN's middle and high schools that are credit deficient and in need of credit recovery and/or academic remediation will have the opportunity to recover credits through the supplemental distance education courses and not risk falling further behind. Moreover, in an effort to attract and maintain currently enrolled students and new students, DAN proposes to expand its advanced coursework through Advanced Placement college level classes for students in need of academic challenge and to equip students with the tools necessary to succeed in the increased demands of the rigor of college and career standards. Finally, DAN seeks to expand its elective offerings to include distance education courses that may not otherwise be available to its students due to not having enough students in any one campus to create a full class such as foreign languages or industry certification classes.

- *The outcomes you expect to achieve across the network of campuses with the addition of the distance education program.*

For students enrolled in distance education courses, it is expected that:

- 1) Ninety (90%) percent of students enrolled in blended distance education classes will

successfully pass the course;

- 2) One Hundred (100%) percent of students enrolled in distance education courses will participate in two-way academic communication with their virtual instructor with support of their face-to-face instructor on a weekly basis.
 - 3) Eighty-five (85%) percent of students enrolled at the school for a three consecutive year period who enroll in blended distance education classes will achieve proficient or advanced status on the state's annual assessment.
 - 4) Seventy (70%) percent of students who enroll in blended distance education courses will show at least a one-year growth in reading and mathematics skills annually.
- *The key components of your educational model and how the distance education program aligns with the educational model. Please include a timeline for when the distance education program will be implemented.*

Preparing students to be successful in rigorous college and career readiness standards requires students to master the skills and knowledge directed by these standards; therefore, DAN is committed to offer students and families options for differentiated learning opportunities such as Distance Education. DAN proposes to provide a unique Distance Education program that balances instructional support and student autonomy while ensuring students are supported every step along the way. Distance Education will serve to supplement and enhance traditional delivery methods already in place providing students with the following additional educational options: credit recovery, Advanced Placement, and/or academic enrichment.

Students will be selected to participate in Distance Education courses based on their individual academic needs. Students in need of a credit recovery course, acceleration courses or a course not regularly offered at the school will be able to enroll in a course through the distance learning program on a part time basis. The students will remain fulltime students at their home school. DAN's proposed Distance Education program will be implemented Fall of 2018.

- *Key supporters, partners, or resources that will contribute to the distance education program.*

The approved distance education providers Accelerate Education, eDynamic, FLVS Global, Fuel Education, Strongmind, and K12 along with the support of Virtual Education that has established successful distance education services to DAN's affiliate schools in Florida will contribute to the success of the distance education program. DAN will recruit and retain interested teachers in expanding their experience to include virtual learning to support distance education. The Executive Director along with the administrative leadership teams at each campus will work collaboratively with all key stakeholders to ensure successful distance education programs.

MEETING THE NEED, ACADEMIC PLAN & OPERATIONS PLAN

TARGETED PLAN

- (1) Identify the community you wish to serve as a result of the distance education program and describe your interest in serving this specific community.*

Doral Academy, in an effort to prepare its middle school and high school students for success in college and career proposes to offer Distance Education coursework to enhance and supplement current course offerings. The target community are students in need of credit recovery or students who are in need of academic challenge or extension. In particular, middle and high school students who are newly enrolled that are credit deficient would have the ability to efficiently complete deficient credit hours. DAN also proposes to expand its course offerings for students who wish to seek advanced and college preparatory classes that would not otherwise be available to them. Distance Education coursework is not intended to replace existing curriculum, but rather enhance and supplement current academic programming effectively reducing barriers to students attending college level classes or having access to a variety of foreign language options.

DAN will serve students and families by addressing the current education needs: providing opportunities for students to recover credit, providing courses not otherwise available at the school such as Advanced Placement, and allow campuses to pool teaching resources to offer coursework that may not have enough students to form a full class at one location such as foreign language.

- (2) Explain how your distance education model, and the commitment to serve the population, including the grade levels you have chosen, would meet the district and community needs and align with the mission of the SPCSA.*

Preparing students to be successful in rigorous college and career readiness standards requires students to master the skills and knowledge directed by these standards; therefore, DAN is committed to offer students and families options for differentiated learning opportunities such as Distance Education. DAN proposes to provide a unique Distance Education program that balances instructional support and student autonomy while ensuring students are supported every step along the way. Distance Education will serve to supplement and enhance traditional delivery methods already in place providing students with the following additional educational options: credit recovery, Advanced Placement, and/or academic enrichment.

Students will be selected to participate in Distance Education courses based on their individual academic needs. Students in need of a credit recovery course, acceleration courses or a course not regularly offered at the school will be able to enroll in a course through the distance learning program on a part time basis. The students will remain fulltime students at their home school.

As DAN continues to build its middle school and high school programs, there is a need for the opportunity for each campus to pool teaching resources to provide opportunities for students to take courses that DAN otherwise may not be able to offer, such as the case when there are not enough students to form a full class. In order to remain competitive in course offering to attract and retain students, DAN must be prepared to offer students fully comprehensive course options such as Advanced Placement courses or a variety of foreign languages. In addition, when students are newly enrolled with the need for credit recovery, DAN will be equipped to offer families the option to enroll in credit bearing Distance Education core courses to avoid falling even further behind.

DAN will utilize existing facilities and technology resources to establish an online blended learning classroom at each campus with a licensed teacher to support students and assist with troubleshooting. Students will independently engage in digital adaptive curriculum with an online teacher with the opportunity to work one-on-one with a traditional teacher as needed. DAN is committed to the goal to ensure each student is ready academically to enter college or move into a career through providing students in grades 6- 12 a combined face-to-face and supplemental online learning opportunity in service to students in need of credit recovery or academic challenge.

The proposed distance education model is fully aligned with the mission of the SPCSA as outlined below:

a) Improving the academic achievement of pupils;

Supplemental online learning will improve academic achievement by allowing students to benefit from differentiated learning options where the student becomes the driver in the model with the flexibility of varying levels of teacher support with the opportunity to gradually become more independent as measured on diagnostic and end-of-course assessments.

(a) Encouraging the use of effective instructional methods of teaching;

Teachers will be encouraged to look beyond traditional methods of teaching and utilize ways that engage today's learner in an online learning environment while also providing the support of face-to-face opportunities as needed. Engaging digital curriculum will meet the need and desires of today's digital native. Utilizing a variety of digital tools will help students reach higher levels of critical and creative thinking.

(b) Providing an accurate measurement of the educational achievement of pupils;

The digital curriculum and ongoing teacher assessments (formative and summative) will be used to measure academic success. End of course assessments are an integral part of the digital curriculum. Diagnostic and ongoing formative assessments throughout the teaching and learning cycle are utilized to inform the instructional staff of student academic progress in real time which in turn will impact the student's fluid movement through the online curriculum. Teachers will use a data dashboard and instructional reports to as a guide in order to provide interventions and document student academic progress.

(c) Establishing accountability and transparency of public schools;

Students and parent/guardians will be required to sign a learning compact that outlines the academic, community and school involvement requirements to be an active member of Distance Education opportunities. Students and parents/guardians will be provided regular weekly updates on their academic progress. The principal will use the principles of site-based management for parent/guardian involvement and decision-making.

(d) Providing a method for public schools to measure achievement based upon the performance of the schools; and

Teachers will measure academic success based on meeting the requirements of the School Performance Framework as well as comparative analysis of other similar Nevada schools.

(e) Creating new professional opportunities for teachers;

Teachers will have the opportunity to work in virtual collaborative teams to determine where their students are academically and how they are progressing through Distance Education courses. This collaborative environment will allow teachers to share successful strategies and interventions. The continuous cycle of learning will be embraced through these methods as well as teacher teaching teachers what success looks like. Training on digital programs will be comprehensive and strategically monitored by their peers and administration. Innovative ways to demonstrate pedagogical knowledge will be utilized to develop leadership capacity (such as peer observation, lesson study, etc.).

PROGRAMS OF DISTANCE EDUCATION (*Distance Education Expansion Amendments*)

A charter school that wishes to provide distance education (online, virtual, cyber, etc.) courses and/or programs (NRS 388.820-388.874 and NAC 388.800-388.860) must submit a distance education application to the Nevada Department of Education prior to or in conjunction with its amendment request to the SPCSA.

(1) Describe the system of course credits that the school will use.

Student's final grade will be determined as follows: 25% value for each of four nine-week grading periods. A teacher may administer an assessment at the end of each nine-week grading period. In order to pass an annual course in grades 6-12, a student must earn a minimum of 10 grade points, of which a minimum of five must be earned in the second semester.

Teacher override (either up or down) can be used. In addition, all students must pass the final exam in their course with at least a 70%.

For senior high school students, the forgiveness policy for required courses is limited to replacing a grade of D or F with a grade of C or higher earned subsequently in the same or comparable course. The forgiveness policy for elective courses is limited to replacing a grade of D or F, with a grade of C or higher earned subsequently in another course. In either situation, when a student attempts forgiveness for a grade, only the new grade will be used to compute the student's GPA.

Any course not replaced according to this policy will be included in the calculation of the cumulative grade point average required for graduation. The only exception to the forgiveness policy stated above applies to middle school students who take any high school course. In this case, forgiveness can be applied to courses with a final grade of C, D, or F. In both authorized semester courses and authorized annual courses, the criteria for grading certain students with disabilities may be modified by the Individual Educational Plan (IEP) team.

The following are the academic grades used:

Enrollment in local colleges, 2005

Grade	Numerical Value%	Verbal Interpretation	Grade Point Value
A	90-100	Outstanding Progress	4
B	80-89	Good Progress	3
C	70-79	Average Progress	2
D	60-69	Lowest Acceptable Progress	1
F	0-59	Failure	0
I	0	Incomplete	0

Once the student is 100% complete with the digital course and has a passing grade, the distance learning program registrar will issue a transcript to the student's home campus indicating the

course and final grade. In addition, the designee at the student's campus will be able to generate transcripts by logging into the SIS once the grade in the course is finalized. All student records in the LMS and SIS are stored in secure servers for a period of seven years. School staff will enter the student grade into the student information system, keep an electronic copy of the transcript and/or print the transcript with the final grade and place it in the student's school folder. The distance education course grade will be entered for each student on Infinite Campus and will be coded as follows: coursecodeDE.

(2) Describe how the school will monitor and verify the participation in and completion of courses by pupils. This should also include details about how the schools plan to supervise students and monitor daily progress.

Students enrolled in distance learning courses are required to interact with their virtual teacher one time per week. All weekly communications between teachers and students are logged into the student information system (Bocavox/MAESTRO) and stored for seven years. Evidence that communication was academic is required. The data will be available 24 hours a day and 365 per year. The attendance reports reflect real-time data and are generated by designated school staff every Monday, or more frequently, to comply with the weekly communication requirement for attendance. Since students will be taking distance education courses on a part time basis, they will be regularly attending a brick and mortar school, so attendance will also be taken in each students' homeroom class. Student attendance and participation in courses is also tracked in the learning management system (Agilix/ Buzz) each time a student logs into their course. Time is tracked by minutes and seconds.

The virtual teacher will monitor and verify student participation in courses through the gradebook within the LMS and SIS. In addition, participation hours will be verified by the homeroom teachers via documented attendance reporting. The academic advisor will monitor course completion through the transcript report available in the SIS.

Both the attendance log and the communication log are available 24 hours per day and 365 days per year. (for all students) along with progress reports, which include updated academic information on student progress. Reports can be accessed at any time by fully trained designated school personnel. The attendance record for the distance learning course is in addition to the record of attendance maintained by the school in which the student attends classes full time.

Students enrolled in Distance Education courses will complete coursework in a designated virtual learning classroom with a face-to-face teacher. The learning classroom will be available during the regular school day and also before and after school.

Progress monitoring tools -- the virtual environment allows students to track their own daily progress with real-time scoring reports that can be depicted in a variety of ways, including graphs and charts. Using the data-collection capabilities of the program, along with baseline data, teachers can receive reports and identify students not meeting expected levels of achievement to provide appropriate interventions: ongoing assessments to inform pacing and differentiate instruction, remediation through supplementary technology, increasing teacher/student/parent communication, ongoing progress monitoring and academic counseling. After each assessment (either weekly, monthly, interim or quarterly) the system generates a report. Teacher can then disaggregate test data and identify benchmarks with unsatisfactory and satisfactory performance. Teachers will identify students' performance within those categories and address the different needs through remediation and enrichment activities.

In addition, reports will be generated weekly in order to identify any students having difficulties with the distance education course. Any students who are not progressing adequately or who fall behind pace will be identified and contacted by the academic coach in order to determine what can be done to assist and if the implementation of an academic improvement plan is needed. Criteria used to trigger identification of pupils who are having difficulty with course assignments or otherwise having difficulty of being successful in the course is as follows:

- Behind pace
- Failing
- Not logging into course
- Teacher unable to make contact

An academic coach is assigned to each student to track progress in their courses in addition to the virtual instructor. Progress is tracked on a weekly basis. Students who are struggling are assigned to one-on-one tutorial sessions with a tutor that specialized in the subject area. The tutor works closely with the student and teacher and provides feedback on progress during the tutorial sessions.

Struggling Student Reports are generated to ascertain which students may be in critical need of academic intervention. They are color coded and the students reflected in red are contacted first.

The program staff monitors student attendance, participation, and performance to ensure that students meet compulsory attendance requirements and are making progress toward successful completion of the course or program as specified in the program's attendance policies. Progress reports are generated and sent via email to students and parents by the 15th of every month. If the 15th of the month falls on a weekend, reports will be sent on the previous Friday.

(3) Describe how the school will ensure students participate in assessments and submit coursework.

In accordance with NRS 388.866: The board of trustees of a school district or the governing body of a charter school that provides a program of distance education shall ensure that for each course offered through the program, a teacher meets or otherwise communicates with the pupil at least once each week during the course to discuss the pupil's progress.

Students enrolled in distance learning courses are required to interact with their virtual teacher one time per week. All weekly communications between teachers and students are logged into the student information system (Bocavox/MAESTRO) and stored for seven years. Evidence that communication was academic in nature and discussions regarding coursework progression and submission is required. The data will be available 24 hours a day and 365 per year. The attendance reports reflect real-time data and are generated by designated school staff every Monday, or more frequently, to comply with the weekly communication requirement for attendance. Since students will be taking distance education courses on a part time basis, they will be regularly attending a brick and mortar school, so attendance will also be taken in each students' homeroom class. Student attendance and participation in courses is also tracked in the learning management system (Agilix/ Buzz) each time a student logs into their course. Time is tracked by minutes and seconds.

The teacher and the student will have a two-way conversation one time per week. All correspondence will be logged into the student information system, in order to track the required interaction. In addition to the documenting of weekly two-way interactions between teachers and students, staff can generate a time logging report in order to ensure that the students are logging

into their virtual courses and submitting coursework in accordance to deadlines in the course pacing guide. The attendance record will be printed out on a monthly basis and will be signed by the teacher of record.

The Virtual program uses varied formative assessments to provide to teachers and students, modify curriculum and monitor student progress. Assessments are varied and valid. They can be in the form of self-checks, practice lessons, auto-graded (including multiple choice and short answer), writing assignments (from the paragraph to creative writing to the research paper), peer review, project or problem based, oral assessments with the instructor, and synchronous and asynchronous collaboration amongst students. Sixty percent (60%) of program assessments reach higher level blooms questioning. These include, but are not limited to, the following:

Affiliation and Collaboration: Courses are designed to engage students with one another, with their instructors, with their families and with their community. These assessments may be completed in a variety of ways including the use of a discussion area, over the phone, or in live web conferencing sessions. The following are standard in the courses:

- One graded collaboration assessment per segment/ semester
- Discussion Based Assessments with the instructor (oral assessments) that fall roughly every four weeks
- One student-to-student, student-to-parent, or student-to-community activity per segment/ semester
- One non-computer related activity per segment/ semester - These are designed to get students away from their computers, and engaged in their learning in a different fashion.
- They address real world learning and provide students opportunities for success within their individual strengths.

Discussion Based Assessments: All courses include an oral assessment with the instructor, which fall about every four weeks. We include these for two main reasons: (1) as a measure of academic integrity; and (2) they provide yet another opportunity for teachers to speak verbally with students to ascertain understanding of the content as well as build rapport. Oral assessments are particularly valuable for students whose strengths lie in verbal, rather than written, communication.

Test Banks: Auto-graded assessments pull questions from test banks so that no two students receive identical questions on assessments. This is yet another academic integrity measure that has been proven successful. This feature also allows teachers to give students additional chances on assessments without worrying students will get exactly the same test.

Rubrics: Rubrics are provided for both teachers and students in the course – it is important that students know exactly what is expected of them.

The Learning Management System (LMS) collects student data and sends it to the SIS in protocol that is updated daily. The two systems work together to track the progress and pace of each student. If a student is falling behind, the system will trigger auto-generated alerts to the teacher. Thus, teachers have the performance data needed to know when appropriate interventions and assistance are necessary. Administrators also receive auto-generated summary reports and parents may access daily progress reports.

Pre/post module tests, quizzes, essays, and diagnostic and discussion-based assessments are used to gauge understanding. Diagnostic assessments in mathematics and reading provide baseline

data and feedback for students of particular skills and/or level. Additional assessments are also used as screening and progress tools to differentiate instruction. Real-time reports are provided on all assessments to help teachers modify pacing and delivery of instruction and interventions to ensure student mastery.

In addition, teachers will contact students one time per week as mandated by NDE program requirements to support students, gauge academic progress and ensure successful course completion. Required course assessments will be set to provide a specific testing window as well as an allotted amount of time within which the students can take the assessments. In addition, in order to ensure academic integrity, the students are to submit all short, long responses and essays through PlagScan (plagiarism scan software). Students will take any required course and State assessments at their home school site. Proctor qualifications will be as set forth by the Nevada Department of Education.

(4) Describe how the school will conduct parent-teacher conferences.

Communication of student progress is key to the success of every student as well as Academy. Weekly progress reports to convey student progress will be provided to each parent. Parent-teacher conferences will be done as needed based on the student's individual progress. These conferences may be conducted over the phone or in person. As a requirement of the enrollment process in Distance Education courses, the students' parent or legal guardian will enter into a written agreement with the pupil outlining the objectives of the course, the timeline for completion, and the method by which the progress of the student will be assessed. The consent form needs to be signed and received from the parent or legal guardian before the student is able to enroll.

(5) Describe how the school will administer all tests, examinations or assessments required by state or federal law or integral to the performance goals of the charter school in a proctored setting.

DAN will administer all required state assessments in a safe, secure and environment free of distractions and within the timeframe required. Academy, according to state and federal law, will use licensed staff as assessment proctors. All proctors will be trained and certified to be a qualified proctor based on state requirements.

SPECIAL EDUCATION

(1) For Distance Education Schools: Describe how the school will provide appropriate services in the distance education learning environment to students with disabilities across a broad continuum.

Progress monitoring by special education staff will be done on a weekly basis to determine the effectiveness of the Distance Education instructional program. Adjustments to instructional program will be made as student progress or lack of progress is determined based on progress monitoring. Revisions to IEPs will occur as adjustments are needed to student's academic program towards a more or less restrictive environment based on progress. Assessment and standardized testing procedures shall be implemented, including guidelines.

All personnel who provide related services (e.g. psycho-social counseling will be provided by a psychologist, Safe School Professional or mental professional, etc.) to students will meet all required licensure and/or certification requirements pertaining to their area of related service. The school may employ such personnel as necessary depending on student need determined from actual

enrollment. If necessary, the school will contract service provider agencies that employ licensed personnel and/or DAN will to contract services from Academica Student Support Services as determined by agreement between Academica and A. If services are outsourced to Academica or through service providers, ACADEMY's principal and special education teacher will oversee, manage, and determine that all students with special needs IEPs are being implemented appropriately.

(2) What systems will you put in place to ensure that staff members are knowledgeable about all legal distance education requirements pertaining to special populations and the servicing of particular populations of students and can answer parent inquiries in a manner consistent with the letter and spirit of state and federal law?

Academy's proposed program of distance education will be delivered using a blended face-to-face model and will comply with all legal distance education requirements pertaining to special population. To that end, DAN will provide planned staff development activities and participate in available appropriate professional development trainings to support access by students with disabilities to the distance education classroom, distance education curriculum, integration of instructional strategies and curriculum adaptations to address the diverse learner, and interaction with non-disabled peers. All DAN personnel who are necessary to provide a student with a disability a FAPE are required to attend any staff development activities or sponsor trainings.

DAN will adhere to the provisions of IDEA and ADA, specifically in distance education, to assure that all students with disabilities are provided services pursuant to FAPE. For special education this includes related services. Related services include speech and language services, counseling, occupational therapy, and/or any other related service as determined by the IEP team.

DAN will also ensure that no student otherwise eligible to enroll in distance education courses will be denied enrollment on the basis of their special education status. A records search of all enrolled students will be conducted to locate all students enrolled who have current IEPs. If a student enrolls in distance education with more services than DAN can provide, the school administrator and special education staff will meet with the parents and the student. At the meeting, Academy's special education distance education service delivery model will be discussed so the parent can make an informed decision. If needed' the IEP will be revised once the student attends distance education courses.

DAN is committed to all of its students who may elect to participate in distance education, including its gifted and talented pupils, students with disabilities, English Language Learners (ELLs), and those with Individual Education Plans (IEPs) or 504 plans. Working closely with Academica Student Support Services, DAN plans on closely partnering with district staff on several fronts to ensure special education programs specifically as it pertains to distance education and services reach students appropriately.

In order to provide a Free and Appropriate Public Education (FAPE), DAN will follow all federal and state laws under the Individuals with Disabilities Education Act (IDEA) (20 USC §1400 et seq). Additionally, DAN will comply with the applicable requirements of Section 504, the Americans with Disabilities Act (ADA) and all U.S. Department of Education Office of Civil Rights ("OCR") mandates for students enrolled in DAN distance education courses. By adhering to the provisions of the IDEA and applicable State of Nevada Special Education Laws and Regulations, DAN will assure that all students with disabilities are accorded FAPE, including special education-related services, and accommodations. DAN will also ensure that no student otherwise eligible to enroll in distance education will be denied enrollment on the basis of their special education or disability status.

Parents of students attending distance education courses will begin the year with understanding the services provided for students with disabilities at Academy. In addition, they will be informed of and sign the learning compact designed to meet all established IEP's or other programs notated, such as distance education, within this section. Parents of students with disabilities will be invited and encouraged, in the same manner as all students at Academy, to attend the school-wide events provided throughout each academic year.

Additionally, parents of students identified with disabilities will receive weekly progress reports regarding the progress their child is demonstrating in distance education courses. The special education teacher will notify parents via phone, letter or email when a formal meeting should be held to discuss their child's ELL progress. Parents of students with disabilities will receive monthly calls from each distance education teacher their student is being serviced by to discuss the progress of their child and to celebrate academic accomplishments. These one-on-one conversations allow for parents to get to know their child's teacher and to ask questions or share their perspective on various matters.

ENGLISH LANGUAGE LEARNERS

(1) Placement: How will the results of the W-APT assessment and other identification and program placement decisions be communicated to staff and parents?

Title III of the Elementary and Secondary Education Act (ESEA) requires schools to assess the English proficiency and notify the parent/guardian of any student pending assessment within 30 calendar days from the beginning of the school year.¹ Students enrolling after the start of the school year must be tested within 10 days, and parents/guardians notified within 15 days of enrollment. (See ESEA Title III, Sections 3302.a and 3302.d)

Once the initial assessment is complete and/or records have been transferred:

For students Classified as Non-English or Limited English Proficient who are coded as non-English or limited English proficient as a result of the initial assessment, the following steps will be completed within the mandated timelines:

1. Classify students who are eligible for ELL services as Non- English or Limited English proficient. The students eligible for ELL services.
2. Prepare a Parent Notification Letter if a student qualifies for ELL services. Once the parent receives the letter, they may choose to receive ELL instructional services. If the parent or guardian refuses ELL instructional services, the school will meet with the parent or guardian to ensure that the parent or guardian understands what is being waived. Parents or guardians may only waive ELL instructional services – not testing. The school will document the parent conference, and place a copy of the waiver in the cumulative student folder.
3. Create a binder for each student classified as non-English, limited English proficient, or fully English proficient. The school will maintain the binder and will make it available to the teachers.

For Students Classified as Fully English Proficient coded as fully English Proficient, as a result of the initial assessment, the school will ensure that the following steps are taken within the mandated

¹ Interpretation Services-PPA will seek to hire enough bilingual staff to meet the needs of its enrolled students and families. PPA will collaborate with Student Support Services to make appropriate accommodations for families needing translation services in languages other than Spanish.

timelines:

1. Assign students who are not eligible for ELL services the appropriate code; and
2. Create a binder for each student classified as non-English, limited English proficient, or fully English proficient. The school will maintain the binder and will make it available to the teachers.

Students will be evaluated with the World-Class Instructional Design and Assessment's (WIDA) Assessing Comprehension and Communication in English State to State for English Language Learners (ACCESS). Students will receive an English Language Proficiency Level on a scale of 1-6 (1-Entering, 2-Emerging, 3-Developing, 4-Expanding, 5-Bridging, 6-Reaching). Teachers will utilize the score report to better differentiate instruction to meet the needs of each student.

Once students are assessed, the Principal will ensure that eligible students are provided appropriate ELL services. In addition, Principals or designees (ELL Teacher) will ensure that ELL students and their parents or guardians are aware of school activities and other opportunities at the school in a language they understand. Students who are eligible for ELL services will receive these services until it is determined, through reevaluation procedures, that they possess adequate English language and academic skills to allow them to perform satisfactorily in general education classes without special instructional considerations.

Parents of students attending will begin the year with understanding the ELL services provided at Academy's distance education program. In addition, they will be informed of and sign the learning compact (translated to accommodate all individual language learners).

Additionally, parents of students identified as ELL will receive weekly progress reports regarding the growth that their child is demonstrating in their distance education course. The ELL Teacher will notify parents via phone, letter or email when a formal meeting should be held to discuss their child's ELL progress in the distance education course. Parents of ELL distance education students will receive monthly calls from their virtual teacher to discuss the progress of their child and to celebrate academic accomplishments. These one-on-one conversations allow for parents to get to know their child's teacher and to ask questions or share their perspective on various matters. If the teacher is not fluent in the home language of the parent, a translator will be provided by the school to ensure that this necessary communication takes place.

DAN will instruct 6th-12th grade using a blended face-to-face model. ELL students will be instructed by a TESOL endorsed instructor under the distance education support framework. ELL students will be provided direct instruction in conjunction with the online platform to better develop language level acquisition.

(2) Staffing: How will you ensure qualified staffing to meet the needs of ELL students under this amendment? What staff will be accountable for ongoing monitoring of the performance of ELL students?

DAN will seek to hire teachers with a Teaching English as a Second Language (TESOL) endorsement to act as the teacher of record. DAN will expand its access to TESOL instructors through providing distance education and pooling resources of its affiliate schools. Teachers with TESOL endorsements will coordinate Title III Programming and ELL services to ensure that student's language proficiency needs are being met. This teacher will also provide staff development to classroom teachers to ensure the implementation of an Evidence Based ELL Program and facilitate intensive instructional interventions like small group pull-outs.

Supporting the educational needs of English Language Learners is a key component of PPA leading all holdings to high academic expectations. PPA will seek to hire a teacher with a CLD endorsement or has completed their ELA requirements preferably ELA-E. This teacher will coordinate Title III Programming and ELL services to ensure that student's language proficiency needs are being met. This teacher will also provide Professional Development to classroom teachers to ensure the implementation of an Evidence Based ELL Program and facilitate intensive instructional interventions like small group pull-outs.

(3) Curriculum and Instruction: What specific instructional programs, practices, and strategies will be employed to ensure academic success and equitable access to the core academic program for English Language Learners?

The Sheltered Content-Based ESL Instruction Model is an integrated content language approach. The goal of the Sheltered Content-Based Instruction Model is for ELL students to develop English language skills in content classes. Secondary ELL students have a limited time to become academically proficient in English. Therefore, ELL students must learn both English and academic content as quickly as possible. English is taught through content areas by including a strong language development component. The purpose of the language development component is to teach English language learners to communicate (listen, speak, read, and write) in English. This component takes into account the ELL student's current English language proficiency level and guides the teacher in providing the appropriate instruction for each level. This model is implemented in an integrated classroom. An integrated classroom consists of students who need ELL services and native English speakers. At the high school level, this model also allows students to earn credit toward graduation in required core subject areas. Emphasis is on cooperative learning, hands-on activities, visuals, demonstrations, modeling, and sheltered vocabulary all made available through virtual classes.

Teachers using the Self-Contained Sheltered Content-Based model should have a TESOL or bilingual endorsement and be endorsed in the content areas. Teachers using the Integrated Sheltered Content-Based model must be endorsed in the content areas and be encouraged to obtain their TESOL or bilingual endorsements.

(4) Monitoring: What plans are in place for monitoring and evaluating the progress and success of ELL students, including the process for exiting students from ELL services as needed?

With the results of the screening from the WIDA-ACCESS, students are placed in their specialized language program. A student will be placed in Structured English Immersion if they receive all 4's and 5's in Speaking, Listening, Reading, and Writing. If a student scores a 3 in the Listening, they will be placed in Sheltered Content Instruction. A student will receive Pull-Out ESL instruction if the CST

(student study team) determines that is the appropriate intervention for them. In addition, the English Language Learner Program is a teacher-recommended program, where students were selected based on their academic success with each teacher.

HOMELESS/MIGRANT SERVICES

(1) Meeting the Need: How will you ensure that identified families receive the required services within the mandated timeframe?

DAN staff review multiple sources to identify/determine students who meet the criteria for homelessness under the Title 1 Hope / McKinney-Vento Act.

Identification:

- At Enrollment - enrollment packet includes proof of residency. If parent/guardian is unable to provide proof of permanent residency, gather information about housing using a questionnaire developed in accordance Title 1 Hope or Nevada state recommendations.
- During enrollment – teachers and staff are provided training on how to identify students that previously were not but may now be classified as homeless. Teachers and staff will refer these students to the academic advisor to gather additional information utilizing the above mentioned to determine whether they meet the homeless eligibility under McKinney-Vento.

SCALE STRATEGY

(1) Describe the steps that you will take to scale your model to new sections, including the people involved and the resources contributed both by the founding campus and the new distance education program.

The Executive Director will work with the middle school and high school Administration to ensure that they are familiar with expectations of recruitment, professional development and procurement of curriculum as it pertains to distance education. In particular, it will be made clear the students eligible to enroll in distance education courses are those students in need of credit recovery, students who are in need of academic challenge through Advanced Placement or extension courses not already available at their campus, and/or students who wish to take an elective course that would not otherwise be available due to not enough students enrolled to form a full class.

Finally, the Executive Director will clearly articulate the process for enrolling the students in the program (whether the students are taking courses for acceleration, credit recovery or because the desired course is not offered at their school site) is as follows:

1. Students in need of an acceleration course, a credit recovery course or a course not available at their home school will be advised of the availability of the course through the distance education program at the school.
2. Students will be directed to the counselor who will evaluate the student's academic record and make course recommendations to student and parents and will verify that the course is appropriate before proceeding.
3. No home-schooled students will be accepted into the program.
4. Enter into a written agreement with the pupil and the pupil's parent or legal guardian outlining the objectives of the course, the timeline for completion of the course and the

method by which the progress of the pupil will be assessed.

5. The consent form needs to be signed and received at the home school. The student will create an account in the Student Information System and request the desired course.
6. The school counselor will review the student's academic information, verify that the student selected the appropriate course and then electronically approve (confirm) the student for enrollment.
7. The distance education program staff will then enroll the student in the virtual course.
8. Upon enrollment, the student will be directed to the Student Orientation course if it is the first time the student takes a virtual course with the program. The Orientation is available to all students upon logging into the software program.
9. Upon completion of the course, the school will generate a transcript reflecting the student name, course taken and final grade.
10. The distance education course grade will be entered for each student on Infinite Campus and the school registrar will designate the courses as a distance education course on the transcript by adding a unique code (the course may be DE or 01 at the end of the course code or name).

(2) *If the school is affiliated with a CMO or EMO that operates distance education in other states, compare your efforts to scale distance education operations to Nevada to past scale distance education efforts in other states.*

This question is not applicable as the school is not affiliated with a CMO or EMO that operates distance education in other states.

STUDENT RECRUITMENT AND ENROLLMENT

Like all public schools, public charter schools must be open to any such child, regardless of that child's race, gender, citizenship, or need for accommodations or special education services. Thus, recruitment and enrollment practices should demonstrate a commitment to providing all students equal opportunity to attend the school, and help schools avoid even the appearance of creating barriers to entry for eligible students.

(1) *Explain the plan for student recruitment and marketing for the new distance education program that will provide equal access to interested students and families, including how the school will comply with the requirements of SB208 (2015 session). Specifically, describe the plan for outreach to: families in poverty; academically low-achieving students; students with disabilities; and other youth at risk of academic failure.*

DAN will utilize a wide range of communication modalities to share its mission openly, and without bias, for the purpose of recruiting current students already enrolled in grades 6–12 who would benefit from distance education courses for students in need of credit recovery, academic enrichment, or electives that would otherwise not be available.

Utilizing both traditional and digital media, DAN will be capable of more open communication to, and greater access for, interested students already enrolled and families, as messages can be targeted for specific needs, such as disability, academic struggle, family poverty, or other extenuating circumstances. Specifically, DAN will communicate its mission and distance education opportunities for students already enrolled in grades 6–12 through the following mediums:

Social Media:

Messages will be posted on social media platforms such as Facebook, Twitter, and Instagram.

Direct Mail:

Direct mail will be used to target those students *already enrolled* in grades 6–12 in near-campus area. Mailers will be done in English and Spanish to reflect the needs of the community.

Mobile Campaigns:

DAN will utilize the latest technologies to message mobile devices either through search, social media, or geo-targeted messages.

Open Houses:

DAN will hold regular open houses to welcome students, parents, and guardians interested in touring the school and learning more about its highly engaging education.

Community Outreach:

DAN will participate in community events and meetings to share its message and to make the DAN staff available for questions and comments. DAN is a part of the communities, and DAN seeks to help those in the community who are in need, by providing quality education options and by participating in community outreach.

- (2) *What is the enrollment calendar for both the first year of operation and subsequent years of operation? Please specify the dates on which the school will begin accepting distance education applications and how long the window will last prior to conducting a lottery.*

Already enrolled students in grades 6-12 will be selected based on their academic needs. Students in need of a credit recovery course, acceleration courses or a course not regularly offered at the school will be able to take the course through the distance learning program on a part time basis. The students will remain fulltime students at their home school. Because students are only eligible to participate in the proposed distance education courses are those who are already enrolled, there will not be a separate calendar or lottery for the distance education program. Furthermore, there is not an application process for the distance education program because students who are eligible must already be currently enrolled in grades 6-12; therefor, this question is not applicable.

- (3) *What distance education enrollment targets will you set and who will be responsible for monitoring progress towards these targets? What is your target re-enrollment rate for each year? How did you come to this determination?*

Because students are only eligible to participate in the proposed distance education courses are those who are already enrolled and will be selected to participate in distance education based on their individual academic needs, there are no enrollment targets or re-enrollment targets for the distance education program. Students will be selected to participate on a case-by-case individualized process; therefor this question is not applicable.

SERVICES

- (1) *Provide a description of how the school leadership team will support the distance education operational execution. Please provide narrative or evidence that illustrates the staffing model, performance metrics, and the school's plan for supporting all operational needs of the school, including but not limited to those listed below. In this space and in the finances section, demonstrate how you will fund the provision of these services.*

The leadership team will use iReady and SBAC assessment data systems to determine a student's eligibility to participate in virtual coursework. DAN's Governing Board submits to a yearly financial audit by an independent third party auditor and DAN will use the audit data to determine the school's ability to provide Distance Education courses. DAN's Board will seek training at least twice per year for four hours total regarding virtual learning.

- **Technology:** Outline the technology infrastructure and support mechanisms across your school, staff, and teachers—including new investments necessary to support this distance education expansion. Your outline should include but not be limited to reliable and secure wide area networking, local area networking (e.g., wireless and cables), hardware (e.g., personal computing devices, servers, telephony, storage, routers, switches), technology policies and procedures, device management, and end user support, including the management of user rights and privileges. The key components of your educational model and how the distance education program aligns with the educational model. Please include a timeline for when the distance education program will be implemented.

DAN will utilize its existing technology infrastructure and support mechanisms across the school, staff, and teacher and no new investments are necessary to support distance education.

DAN will utilize the following existing infrastructure and support mechanisms:

- Internet will be provided by a reliable Internet Service Provider protected by an enterprise router.
- Local area networking is provided by managed switches and wireless access points.
- Hardware: Each teacher will have one teacher computer and a 1:1 student to computer ratio in the classroom. Each office staff member will have a computer to utilize. There will be one computer lab and at least one laptop cart.
- DAN will contract with its service provider, Intellatek for support in device management and user support.

The approved distance education providers Accelerate Education, eDynamic, FLVS Global, Fuel Education, Strongmind, and K12 all provide the servers that currently contain the production systems (curriculum) and data are in a highly-secured off-site collocation center (IOData). Physical access to the systems are restricted to essential personnel only.

The IOData facilities have guarded site access: only pre-authorized personnel may enter the parking area (access-card and human guard to compare face to card photo)

- The facility exterior door requires card-scan plus key-code
- interior “man-trap” door requires keycard and retina eye-scan to permit entry to server floor
- additional card scans required to reach rack cages
- racks are locked with combination door locks

Electronic access to server systems by developer and operations employees require approved secured and encrypted VPN access, followed by ID and password access to individual server systems

Data on database systems are encrypted and secured and can only be access via secure credentials.

Because DAN teachers will be utilizing distance education courses to enhance and supplement existing DAN educational model and programs, they will align with the mission and vision of Doral Academy of Nevada. Distance Education is not a means to replace any existing programs or curriculum.

It is expected that the distance education program will be available for currently enrolled students in grades 6-12 in the fall of 2018.

FINANCIAL PLAN

(1) Describe the costs associated with the inclusion of the Distance Education program including technology infrastructure and support mechanisms across your school, staff, and teachers—including new investments necessary to support this distance education expansion. Your outline should include but not be limited to reliable and secure wide area networking, local area networking (e.g., wireless and cables), hardware (e.g., personal computing devices, servers, telephony, storage, routers, switches), technology policies and procedures, device management, and end user support, including the management of user rights and privileges.

With the utilization of existing school technology equipment, the costs associated with the inclusion of a distance education program will include a range of pricing from \$30 to a maximum of \$175 per pupil per semester per course amount and a \$75 per teacher per student per course amount. Therefore, for each distance education course, the total amount per pupil would be \$250. These distance education courses will be provided by the following approved distance education providers: Accelerate Education, eDynamic Learning, FLVS Global, Fuel Education, K12 and StrongMind.

Attachment 1: Courses for State Approval

ATTACHMENT 1: Courses for State Approval

At this time there are no courses that are to be reviewed for state approval; therefore, this question is not applicable. Please see approved Distance Education from the Nevada Department of Education in Attachment 2 for a complete list of courses that have been approved.

March 27, 2018

Bridget Phillips, Executive Director
Doral Academy of Nevada
626 Crossbridge Dr.
Las Vegas, NV 89138

Dear Ms. Phillips:

A thorough review of the Doral Academy of Nevada application to conduct a distance education program has been completed. **Please accept this as official notification that the Doral Academy of Nevada is approved to operate the distance education program as submitted to the Department of Education.** All courses included in the application are approved for use. Approval of the program will be for the period beginning July 1, 2018, through June 30, 2021. Approved Distance Education programs are in effect for three years. If your district makes significant changes within your Distance Education programs, revisions to the currently approved plan will be required.

As a point of information, all courses that have been approved as part of a distance education program in Nevada are to be included on the "State Approved" list of distance education courses.

If you have any questions regarding the implementation of the program as it relates to statutory or regulatory requirements, or if you have any questions or concerns, please feel free to contact me at (775) 687-7288.

Sincerely,

A handwritten signature in blue ink that reads "Tracy Moore".

DISTANCE EDUCATION PROGRAM

APPLICATION COVER PAGE

CERTIFICATION

I HEREBY CERTIFY that, to the best of my knowledge, the information contained in this application is accurate and that the distance education program will be operated as described in the application. As the authorized representative of the school district or charter school submitting the application, assurance is provided to the Department of Education that the persons who operate the program on a day-to-day basis will comply with and carry out all applicable requirements, statutes, regulations, rules and policies of the school district or charter school.

Name and Signature of the school district superintendent, charter school principal or other appropriate designee of the applicant authorized to submit this application must be provided below:

Name and Title

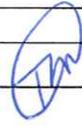

Signature *Bridget Phillips*

Bridget Phillips, Executive Director

Indicate the date the applicant's board of trustees, governing body or committee to form a charter school met to approve the submission of this application: January 10, 2018

Section 1: Identify all distance education courses that will be offered. If a course of distance education that will be offered through the program is currently included on the list of approved distance education courses prepared by the Department, please include an identification of each course, including, without limitation, the title of the course and the name of the provider of the course of distance education.

The courses to be used will be from four approved distance education providers: Accelerate Education, eDynamic Learning, FLVS Global, Fuel Education, K12 and StrongMind. The applicant will not be developing any courses. Any new courses proposed by the applicant will be submitted by Accelerate Education, eDynamic Learning or FLVS Global, Fuel Education, K12 and StrongMind and will only be use if they are approved by the Nevada Department of Education NDE. All courses to be used are currently included on the list of approved distance education courses prepared by the Nevada Department NDE. The program provider proposes to use courses from four approved distance education providers: Accelerate Education, eDynamic Learning and FLVS, Fuel Education, K12 and StrongMind. Course lists for each Nevada approved provider are included below:

Section 2. Describe the process that will be used to enroll students in the distance education program.

The process for enrolling the students in the program (whether the students are taking courses for acceleration, credit recovery or because the desired course is not offered at their school site) is as follows:

1. Students in need of an acceleration course, a credit recovery course or a course not available at their home school will be advised of the availability of the course through the distance education program at the school.
2. Students will be directed to the counselor who will evaluate the student's academic record and make course recommendations to student and parents and will verify that the course is appropriate before proceeding.
3. No home-schooled students will be accepted into the program.
4. Enter into a written agreement with the pupil and the pupil's parent or legal guardian outlining the objectives of the course, the timeline for completion of the course and the method by which the progress of the pupil will be assessed.
5. The consent form needs to be signed and received at the home school. The student will create an account in the Student Information System and request the desired course.
6. The school counselor will review the student's academic information, verify that the student selected the appropriate course and then electronically approve (confirm) the student for enrollment.
7. The distance education program staff will then enroll the student in the virtual course.
8. Upon enrollment, the student will be directed to the Student Orientation course if it is the first time the student takes a virtual course with the program. The Orientation is available to all students upon logging into the software program.
9. Upon completion of the course, the school will generate a transcript reflecting the student name, course taken and final grade.
10. The distance education course grade will be entered for each student on Infinite Campus and the school registrar will designate the courses as a distance education course on the transcript by adding a unique code (the course may be DE or 01 at the end of the course code or name).

For students who are regularly enrolled in the school district or charter school, describe the process the school district or charter school will follow regarding the selection and enrollment of students in the program of distance education.

Students will be selected based on their academic needs. Students in need of a credit recovery course, acceleration courses or a course not regularly offered at the school will be able to take the course through the distance learning program on a part time basis. The students will remain full-time students at their home school.

If the distance education program will allow the enrollment of students, full or part-time, from other school districts or charter schools within Nevada, describe the process to be followed regarding how the required written permission and agreement from the other school district or charter school will be obtained for each student. In addition, please

describe the contents of the agreement including any reimbursement made between school districts or charter schools.

According to NRS 388.858, a pupil enrolled in charter school: permission of charter school not required for part-time enrollment; written agreement between charter school and provider of distance education program required when pupil is enrolled in program part-time; A pupil who is enrolled in a charter school may enroll part-time in a program of distance education that is provided by a school district or another charter school and is not required to obtain the approval of the governing body of the charter school in which the pupil is enrolled.

Section 3: Provide an explanation of how the school district or charter school will document each pupil’s attendance and participation in courses offered through the distance education program.

In accordance with NRS 388.866: The board of trustees of a school district or the governing body of a charter school that provides a program of distance education shall ensure that for each course offered through the program, a teacher meets or otherwise communicates with the pupil at least once each week during the course to discuss the pupil’s progress;

Students enrolled in distance learning courses are required to interact with their teacher one time per week. All weekly communications between teachers and students are logged into the student information system (Bocavox/MAESTRO) and stored for seven years. The data will be available 24 hours a day and 365 per year. The attendance reports reflect real-time data and are generated by designated school staff every Monday, or more frequently, to comply with the weekly communication requirement for attendance. Since students will be taking distance education courses on a part time basis, they will be regularly attending a brick and mortar school, so attendance will also be taken in each students’ homeroom class. Student attendance and participation in courses is also tracked in the learning management system (Agilix/ Buzz) each time a student logs into their course. Time is tracked by minutes and seconds. (See image below for sample.)

Both the attendance log and the communication log are available 24 hours per day and 365 days per year. (for all students) along with progress reports, which include updated academic information on student progress. Reports can be accessed at any time by fully trained designated school personnel. The attendance record for the distance learning course is in addition to the record of attendance maintained by the school in which the student attends classes full time (in instances where the student is enrolled in the distance learning program on a part-time basis).

Provide a brief description of the process the school district or charter school will follow to ensure an accurate accounting of the student's attendance and participation in the distance education program. Please note that regulations require that the teacher assigned to each course must meet or otherwise communicate with each student at least once each week for the pupil to be considered enrolled in the program of distance education. The student shall be considered in full attendance for each week the teacher meets or communicates with the student. The attendance of the student must be recorded weekly as part of the master register of enrollment and attendance.

The teacher and the student will have a two-way conversation one time per week. All correspondence will be logged into the student information system, in order to track the required interaction. In addition to the documenting of weekly two-way interactions between teachers and students, staff can generate a time logging report in order to ensure that the students are logging into their virtual courses and submitting coursework in accordance to deadlines in the course pacing guide. The attendance record will be printed out on a monthly basis and will be signed by the teacher of record. Screen captures of communication log, communication log details accessed by clicking on the subject field and time logging report are reflected below.

Both the attendance log and the communication log are available 24 hours per day and 365 days per year.

For each student who is enrolled full time in a program of distance education, the school district that provides the program must designate one public school within that school district to which the student will be affiliated. The student must be reported weekly as enrolled and in attendance in the school designated by the school district.

The proposed program will be a part time program. Therefore, the student will be affiliated to the school they attend on a full-time basis.

For each student who is enrolled part time in a program of distance education for which an agreement has been constructed between school districts or charter schools, the student must be reported weekly as enrolled and in attendance in the class. The record of part time attendance must be maintained separately from the record of attendance maintained by the school in which the pupil attends classes full time.

As previously stated, the proposed program will be a part-time distance education program. Attendance at the full-time school is recorded on the SIS (Infinite Campus). The reporting of attendance for the part time school will be done separately.

Section 4. Describe the plan that will be followed for assessing the achievement of students enrolled in the distance education program. Provide a description of the plan (process) the school district or charter school will follow regarding the assessment of students in the required State achievement and proficiency examinations and other assessments required of all students by the school district or charter school for all applicable grades. Provide a description of how required course assessments will be administered to include proctor qualifications.

The Virtual program uses varied formative assessments to provide to teachers and students, modify curriculum and monitor student progress. Assessments are varied and valid. They can be in the form of self-checks, practice lessons, auto-graded (including multiple choice and short answer), writing assignments (from the paragraph to creative writing to the research paper), peer

review, project or problem based, oral assessments with the instructor, and synchronous and asynchronous collaboration amongst students. Sixty percent (60%) of program assessments reach higher level blooms questioning. These include, but are not limited to, the following:

Affiliation and Collaboration: Courses are designed to engage students with one another, with their instructors, with their families and with their community. These assessments may be completed in a variety of ways including the use of a discussion area, over the phone, or in live web conferencing sessions. The following are standard in the courses:

- One graded collaboration assessment per segment/ semester
- Discussion Based Assessments with the instructor (oral assessments) that fall roughly every four weeks
- One student-to-student, student-to-parent, or student-to-community activity per segment/ semester
- One non-computer related activity per segment/ semester - These are designed to get students away from their computers, and engaged in their learning in a different fashion. They address real world learning and provide students opportunities for success within their individual strengths.

Discussion Based Assessments: All courses include an oral assessment with the instructor, which fall about every four weeks. We include these for two main reasons: (1) as a measure of academic integrity; and (2) they provide yet another opportunity for teachers to speak verbally with students to ascertain understanding of the content as well as build rapport. Oral assessments are particularly valuable for students whose strengths lie in verbal, rather than written, communication.

Test Banks: Auto-graded assessments pull questions from test banks so that no two students receive identical questions on assessments. This is yet another academic integrity measure that has been proven successful. This feature also allows teachers to give students additional chances on assessments without worrying students will get exactly the same test.

Rubrics: Rubrics are provided for both teachers and students in the course – it is important that students know exactly what is expected of them.

The Learning Management System (LMS) collects student data and sends it to the SIS in protocol that is updated daily. The two systems work together to track the progress and pace of each student. If a student is falling behind, the system will trigger auto-generated alerts to the teacher. Thus, teachers have the performance data needed to know when appropriate interventions and assistance are necessary. Administrators also receive auto-generated summary reports and parents may access daily progress reports.

Pre/post module tests, quizzes, essays, and diagnostic and discussion-based assessments are used to gauge understanding. Diagnostic assessments in mathematics and reading provide baseline data and feedback for students of particular skills and/or level. Additional assessments are also used as screening and progress tools to differentiate instruction. Real-time reports are provided

on all assessments to help teachers modify pacing and delivery of instruction and interventions to ensure student mastery.

In addition, teachers will contact students one time per week as mandated by NDE program requirements to support students, gauge academic progress and ensure successful course completion.

Required course assessments will be set to provide a specific testing window as well as an allotted amount of time within which the students can take the assessments. In addition, in order to ensure academic integrity, the students are to submit all short, long responses and essays through PlagScan (plagiarism scan software).

Students will take any required course and State assessments at their home school site. Proctor qualifications will be as set forth by the Nevada Department of Education.

Section 5. Describe how the school district or charter school will document successful course completion and the awarding of course credit to students.

The description must include how the school district or charter school will document the completion of the distance education courses by individual students, how the records will be stored and maintained as well as how the school district or charter school will issue individual grades to students who complete distance education courses.

In all courses, the student's final grade will be determined as follows: 25% value for each of four nine-week grading periods. A teacher may administer an assessment at the end of each nine-week grading period. In order to pass an annual course in grades 6-12, a student must earn a minimum of 10 grade points, of which a minimum of five must be earned in the second semester. Teacher override (either up or down) can be used. In addition, all students must pass the final exam in their course with at least a 70%.

For senior high school students, the forgiveness policy for required courses is limited to replacing a grade of D or F with a grade of C or higher earned subsequently in the same or comparable course. The forgiveness policy for elective courses is limited to replacing a grade of D or F, with a grade of C or higher earned subsequently in another course. In either situation, when a student attempts forgiveness for a grade, only the new grade will be used to compute the student's GPA. Any course not replaced according to this policy will be included in the calculation of the cumulative grade point average required for graduation. The only exception to the forgiveness policy stated above applies to middle school students who take any high school course. In this case, forgiveness can be applied to courses with a final grade of C, D, or F. In both authorized semester courses and authorized annual courses, the criteria for grading certain students with disabilities may be modified by the Individual Educational Plan (IEP) team.

The following are the academic grades used:

Grade	Numerical Value (%)	Verbal Interpretation	Grade Point Value
A	90 - 100	Outstanding progress	4
B	80 - 89	Good progress	3
C	70 - 79	Average progress	2
D	60 -69	Lowest acceptable progress	1
F	0 - 59	Failure	0
I	0	Incomplete	0

Once the student is 100% complete with the digital course and has a passing grade, the distance learning program registrar will issue a transcript to the student's home school indicating the course and final grade. In addition, the designee at the student's school will be able to generate transcripts by logging into the SIS once the grade in the course is finalized. All student records in the LMS and SIS are stored in secure servers for a period of seven years. School staff will enter the student grade into the student information system, keep an electronic copy of the transcript and/or print the transcript with the final grade and place it in the student's school folder. The distance education course grade will be entered for each student on Infinite Campus.

Section 6. Describe how the school district or charter school will monitor the progress of students enrolled in the program.

Provide a description of the process to be followed by the school district or charter school regarding the monitoring of progress being made by students enrolled in distance education courses.

Please include any criteria that will be used to trigger the identification of pupils who are having difficulty with course assignments or are otherwise having difficulty in being successful in the course. In addition, describe the technical assistance/support that will be provided to students who are not making adequate progress in their distance education courses. Special Notes

Progress monitoring tools - the virtual environment allows students to track their own daily progress with real-time scoring reports that can be depicted in a variety of ways, including graphs and charts. Using the data-collection capabilities of the program, along with baseline data, teachers can receive reports and identify students not meeting expected levels of achievement to provide appropriate interventions: ongoing assessments to inform pacing and differentiate instruction, remediation through supplementary technology, increasing teacher/student/parent communication, ongoing progress monitoring and academic counseling. After each assessment (either weekly, monthly, interim or quarterly) the system generates a report. Teacher can then disaggregate test data and identify benchmarks with unsatisfactory and satisfactory performance. Teachers will identify students' performance

within those categories and address the different needs through remediation and enrichment activities.

In addition, reports will be generated weekly in order to identify any students having difficulties with the distance education course. Any students who are not progressing adequately or who fall behind pace will be identified and contacted by the academic coach in order to determine what can be done to assist and if the implementation of an academic improvement plan is needed.

Criteria used to trigger identification of pupils who are having difficulty with course assignments or otherwise having difficulty of being successful in the course is as follows:

Behind pace

Failing

Not logging into course

Teacher unable to make contact

Reporting is versatile with teacher and administrator reports available by single or multiple students. An item analysis is available for all work and assessments by student or by class. The program's platform is able to provide performance graphs, enrollment lists and other custom reports as required. Further, administrator reports can provide a diverse array of important data including demographics, teaching and learning effectiveness, ability to roll-up or drill down from a school-wide report to individual students. Administrator reports can track and target groups for learning gains and progress on course recovery. Further, reports can be viewed on-line by students or their parents and automatically sent to their Email to update them of their progress in real time. Each level of user has a secure logon to access available information and data.

Below is a sample report used to monitor students.

An academic coach is assigned to each student to track progress in their courses in addition to the virtual instructor. Progress is tracked on a weekly basis. Students who are struggling are assigned to one-on-one tutorial sessions with a tutor that specialized in the subject area. The tutor works closely with the student and teacher and provides feedback on progress during the tutorial sessions.

Struggling Student Reports are generated to ascertain which students may be in critical need of academic intervention. They are color coded and the students reflected in red are contacted first.

The program staff monitors student attendance, participation, and performance to ensure that students meet compulsory attendance requirements and are making progress toward successful completion of the course or program as specified in the program’s attendance policies. Progress reports are generated and sent via email to students and parents by the 15th of every month. If the 15th of the month falls on a weekend, reports will be sent on the previous Friday.

Users can contact support staff by emailing support@aveteaching.com, or they can login to our support portal. A ticket is opened and tracked to ensure resolution. Staff is available 24/7 to provide assistance to users with technical issues. We currently have 2 help desk specialists

available at all times, one manager, and 10 online tutors. Live sessions can be accessed by clicking the links located on our website.

NOTICE OF PUBLIC MEETING

of the

Board of Directors of Doral Academy of Nevada

Notice is hereby given that the Board of Directors of Doral Academy of Nevada, a public charter school, will conduct a telephonic public meeting on January 10, 2018 beginning at 9:00 a.m. The call-in information is as follows:

Call-in Number: 1-866-244-8528

Access Code: 251188#

The public is invited to attend. Anyone that wishes to make public comment is welcome to attend the meeting at 6630 Surrey Street, Las Vegas, Nevada 89119.

Attached hereto is an agenda of all items scheduled to be considered.

Please Note: The Board of Directors of Doral Academy of Nevada may 1) take agenda items out of order; 2) combine two or more items for consideration; or 3) remove an item from the agenda or delay discussion related to an item at any time.

Reasonable efforts will be made to assist and accommodate physically handicapped persons desiring to attend or participate at the meeting. Any persons requiring assistance may call Jennifer Elison at (702) 431-6260 at least two business days in advance so that arrangements may be made.

Public comment may be limited to three minutes per person at the discretion of the Chairperson.

AGENDA

January 10, 2018 Meeting of the Board of Directors of Doral Academy of Nevada

(Action may be taken on those items denoted “For Possible Action”)

1. Call to Order and Roll Call
2. Public Comment (For Discussion) No action may be taken on a matter raised under this item of the agenda until the matter itself has been specifically included on an agenda as an item upon which action will be taken.
3. Approval of Minutes from the November 29, 2017 Board Meeting (For Possible Action)
4. Discussion and Possible Action to Approve Providing Distance Education Courses to Upper School and High School Students (For Possible Action)
5. Public Comment (For Discussion) No action may be taken on a matter raised under this item of the agenda until the matter itself has been specifically included on an agenda as an item upon which action will be taken.
6. Adjournment

- (5) Doral Academy- Red Rock Upper/High – 610 Crossbridge Dr., Las Vegas, Nevada
- (6) North Las Vegas City Hall, 2250 Las Vegas Blvd. North, North Las Vegas, Nevada
- (7) Henderson City Hall, 240 South Water Street, Henderson, Nevada
- (8) Las Vegas City Hall, 495 S. Main St., Las Vegas, Nevada

**MINUTES
of the meeting of the
BOARD OF DIRECTORS of DORAL ACADEMY OF NEVADA
January 10, 2018**

The Board of Directors of Doral Academy of Nevada held a telephonic meeting on January 10, 2018 at 9:00 a.m.

1. Call to Order and Roll Call

Board Chairperson Boone Cragun called the meeting to order at 9:05 a.m. with a quorum present. In attendance were Board Members Boone Cragun, Karla Zobrist, John McClain, and Andre Winslow.

Board Members Jerod Allen and Erin Bedich were not present for this meeting.

Also present was Executive Director Bridget Phillips, as well as Academica representatives Kyle McOmer and Jennifer Ranney

2. Public Comment

There was no request for public comment.

3. Approval of Minutes from the November 29, 2017 Board Meeting

Member McClain moved to approve the minutes from the November 29, 2017 Board Meeting. Member Winslow seconded the motion, and the Board voted unanimously to approve.

4. Discussion and Possible Action to Approve Providing Distance Education Courses to Upper School and High School Students

Mr. Kyle McOmer addressed the Board and stated that approval was requested from the Board to submit an application for approval to provide distant education courses for the upper and high school students; adding that he had been working with Academica Florida to prepare the documents, and that the submission of the application was due by January 15, 2018. Executive Director Bridget Philips addressed the Board and stated it had always been a goal of Doral Academy Nevada to work with Doral of Florida and to be able to extend course offerings, especially to the high school students.

Member Cragun stated that the approval was to enable the frame work to be in place should the Board chose to move forward and asked if the cost was known, to which Ms. Jennifer Ranney addressed the Board and replied that the cost would depend on the provider chosen by the Board, and that there were a couple of different frameworks to select from that might be most cost effective. Member Zobrist asked

when the courses would be available if approved, to which Ms. Ranney replied that they could be available for the next school year. Discussion ensued in regards to the type of course work and how it would be chosen.

Member Cragun moved to approve the submission of the Distant Education Courses application, giving Executive Director Bridget Philips the authority to sign the document; and approval to amend the Charter. Member Zobrist seconded the motion, and the Board voted unanimously to approve.

5. Public Comment

No request for public comment.

6. Adjournment

The meeting was adjourned at 9:15 p.m.

Approved on: 1-24-18

Treasurer Karla Zofasit
Secretary of the Board of Directors
Doral Academy of Nevada.

Attachment 4: Course Alignment

The course providers eDynamic, Accelerate Education, Fuel Education (K12.Inc), BYU, and FLVS have been vetted and approved by the Nevada Department of Education, Distance Education and are on the “Approved Course Provider List.” Therefore, the content aligns with all applicable academic standards such as the Nevada Academic Content Standards (NVACS) based on the Common Core State Standards (CCSS) for English language arts and mathematics. Documentation has been provided to the Nevada Department of Education as part of the course provider approval process.

Department of Education, Distance Education Approved Course Provider List can be accessed at the following link:

[http://www.doe.nv.gov/Distance Education/Home/](http://www.doe.nv.gov/Distance%20Education/Home/)

A complete list of Nevada aligned standards to Distance Education courses in core subjects as “Attachment 4: Course Alignment” is available and can be accessed at the following link:
