

SPCSA ACADEMIC PERFORMANCE FRAMEWORK

The SPCSA Academic Performance Framework will incorporate the Nevada School Performance Framework because it includes many key performance indicators. The NSPF results for each school will be combined with the following measures to create a final score/rating under a revised SPCSA Academic Performance Framework.

NSPF/Star Rating – Graduation rates, Student proficiency, growth, closing opportunity gaps, ELA proficiency and school quality indicators.

Geographic Comparison – Are the students performing well on the state accountability (NSPF index score) compared to zoned schools and local district?

Diversity – How is student enrollment on special populations (English Language Learners, Free and Reduced Lunch and Individualized Education Plan) compared with their local district.

School Progress Measure - Reducing non-proficient students the prior year's performance (seeing decline in the proportion of students who aren't proficient) in ELA and Math.
