At what point will the Charter Authority reverse it's decision to allow 40% of students in the classroom? We are currently at a 22.3% positivity rate for Covid-19, yet 4 days per week I have students in my classroom. Because this state does not seem to care for the teachers it so badly needs, I will be leaving and returning to Alaska to teach in January. My school, the Charter Authority, and Governor Sisolak have all jeopardized my health and well being. Nevada is constantly short teachers, especially in Clark County. Well, you have lost another Math and Science teacher because of greedy bad policy. Good Luck.
