---

Many of my colleagues at Legacy Traditional School are outraged we are in person and feel unsafe at work. Some of us are actively looking for a teaching contract with CCSD, because of the health risks of being in the school building with students 4 days a week. Nevada is 2nd in the country for highest Covid infection rates now. This charter board has abandoned us during this pandemic, during the worst of it. The fact you still meet virtually is noticed. We have another outbreak in our school, so that's two in a month, so far.
