

## **Amendment Summary**

### **Changes to:** *Temporary Location and Enrollment*

Due to the delayed delivery of Cactus Park Elementary's permanent building at 3115 Las Vegas Blvd, the school year has begun at a temporary location situated at Nevada Prep. Although this temporary location served its purpose in providing a space for the day-to-day operations, it has caused over 100 families to rescind their registration with Cactus Park Elementary, as the majority of the families who intended to attend live within a three mile radius of the permanent school site.

To put a stop to the attrition caused by the temporary location, Cactus Park Elementary is requesting to add transportation back to its charter contract, but only to provide busing for students to and from the permanent building to the temporary location during this interim period. Once the school moves into its permanent location, Cactus Park Elementary will continue to abide by its approved amendment in removing full transportation services as a part of its school model in year 1, with tentative transportation services for years 2 and beyond.
